

## **Sports in 1910**

by Hunter J. Collins

How were the sports in 1910 at Alma College? See what the atmosphere was like back in the day, to see how people went to the games and how they supported the team in each game. The goals are to get information on the games from the reporters and the school newspaper to see how the college reacts to the win compared to anything else. My research is reading the paper and picking out the bits and pieces that best fit the process I'm trying to research. This is the goal to get the point through football to see how different the game was over a 100 years ago compared to how I play the game now and have played for 15 years. I want to learn more about the game back then and try to bring some of that to the surface even though many people won't learn or read about it because maybe it doesn't interest them. I have played the game for so long so I want to research further and give you the point of view that I have now compared to the game back then and see what is different and what is the same because we're on team 127. I want to teach people about the culture of two completely different times and different cultures. I hope the research I provide is very knowledgeable and entertaining to everyone and what I have learned from playing the game compared to other people playing.
