Analysis

1. Alma College Performance:

- In 2022, Alma College had an 89.8% rate.
- It saw a **sharp increase** in 2023 to 94.9%.
- However, in 2024, there was a **drop** to 85.7%, the lowest percentage in this period.
- In 2025, it rebounded **significantly** to 94.7%, nearly matching the 2023 peak.

This indicates some **fluctuations** in Alma College's performance, with a major dip in 2024 before recovering in 2025. It suggests that 2024 might have had unusual challenges affecting performance, but the recovery in 2025 is a strong positive indicator.

2. State Average Performance:

- The state average remains **relatively stable** over the years, fluctuating slightly between 90% and 91.7%.
- This suggests **consistency** in the overall state performance, without any significant jumps or drops.

3. Comparing Alma College and the State Average:

- Alma College was **below the state average** in 2022 and 2024.
- In 2023 and 2025, Alma College **outperformed** the state average.
- The variability in Alma College's performance contrasts with the **steady** state trend.

Key Takeaways:

- Alma College is capable of high performance, reaching nearly 95% in two separate years.

- The **2024 dip suggests potential challenges**, possibly due to curriculum changes, external factors, or student preparedness.
- The **strong rebound in 2025** indicates successful corrective actions.
- The **state average remains a stable benchmark**, making Alma College's fluctuations stand out.
